What's the Score?

Make up math story problems for yourself, a friend, or a family member like the examples shown below. Then try to solve them.

•If a team scores two touchdowns with extra points and three field goals, how many points do they have?

$$7+7+3+3+3=23 \text{ points}$$

•If the Tigers have 31 points and their opponent has 14 points, how many points are the Tigers winning by?

$$31 - 14 = 17 \text{ point lead}$$
